

**Question 1 (required, 300-word max)**

What is your interest in applying for CardioQuip's Engineering Internship program? What are your career or academic goals, and how would an internship with CardioQuip fit into that vision?

**Question 2 (required, 300-word max)**

CardioQuip hires interns for R&D and Quality Engineering programs. Which program are you interested in applying for (both are acceptable)? Explain the differences between these roles, and your understanding of how both work together to ensure robust and compliant product development and post-market surveillance.

**Question 3 (required, 300-word max)**

Describe your proudest engineering-related project or technical achievement outside of your coursework. What were some of the challenges associated with the project? What skills did you acquire through this endeavor that separate you from your peers?

**Question 4 (optional 300-word max):**

Is there any else you would like us to know about you or your application that may not be apparent through the above questions or the attached files?
